

Material List for Portable Mat Cutter as per Cody Smith

- (1) 48" x 1 1/2" aluminum bar
- (6 linear feet) 1x2 pine board — (1) 48" and (1) 24" will work
- (2) hinges with screws
- (1) cabinet handle
- (6) 3/4" wood screws
- (6) 1 1/4" wood screw
- (1) 1" x 12" x 48" shelf board (only needed to make the mat cutter portable)

Note: these are the materials for making a mat cutter as demonstrated at today's meeting.

Variations of this mat cutter can be made, for example a 2" aluminum bar can be substituted and used to measure 2" mat boarders.

A smaller mat cutter can be made by using a shorter aluminum bar and base board ... it all depends on what you want.
